

# **ADA-PARC Scorecard Report**

# Theory

Purpose of ADA-PARC Scorecard development is to translate raw measures into easily interpretable and comparable indices of quality of life for the disabled population.

# Approach

There are three ways we can think about the 'state of affairs' for the disabled population in any given state x for metric y:

1. Relative Terms :

How does disabled population in state x fare on metric y compared to disabled population in other states?

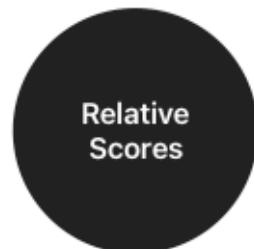

2. Equity Terms :

How does the discrepancy on metric y between the disabled population in state x and non-disabled population in state x compare to the discrepancy in other states?

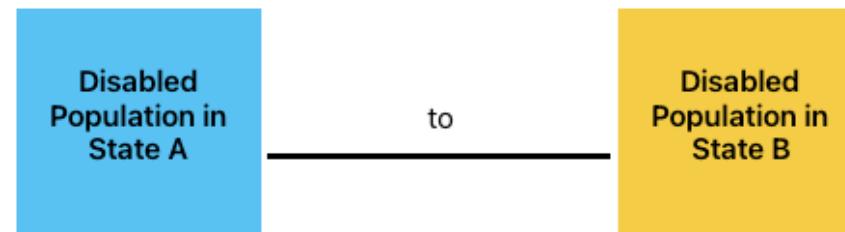

3. Overall Terms :

How does disabled population in state x fare on metric y, averaging both relative and equity terms?

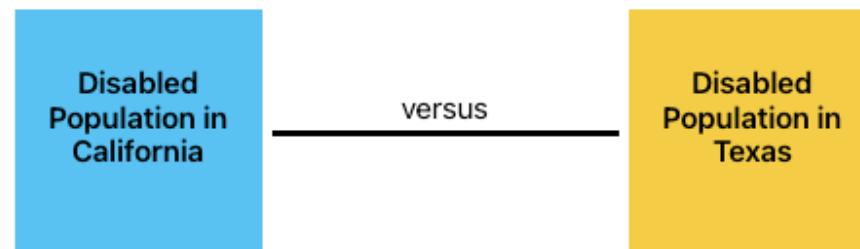

# Relative Scores

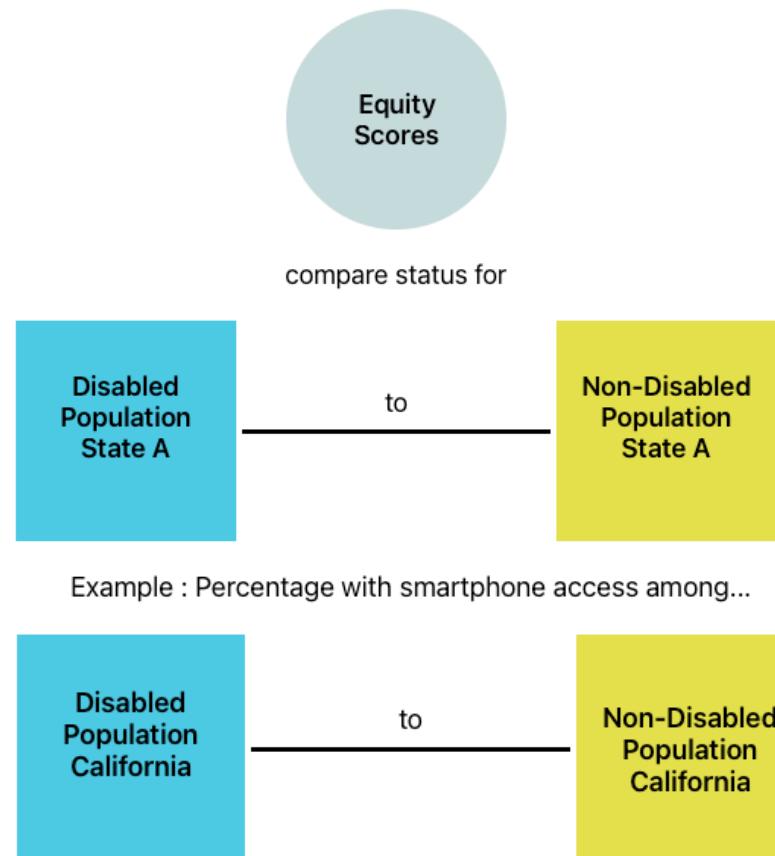

compare status for

Example : Percentage with smartphone access among...

# Equity Scores

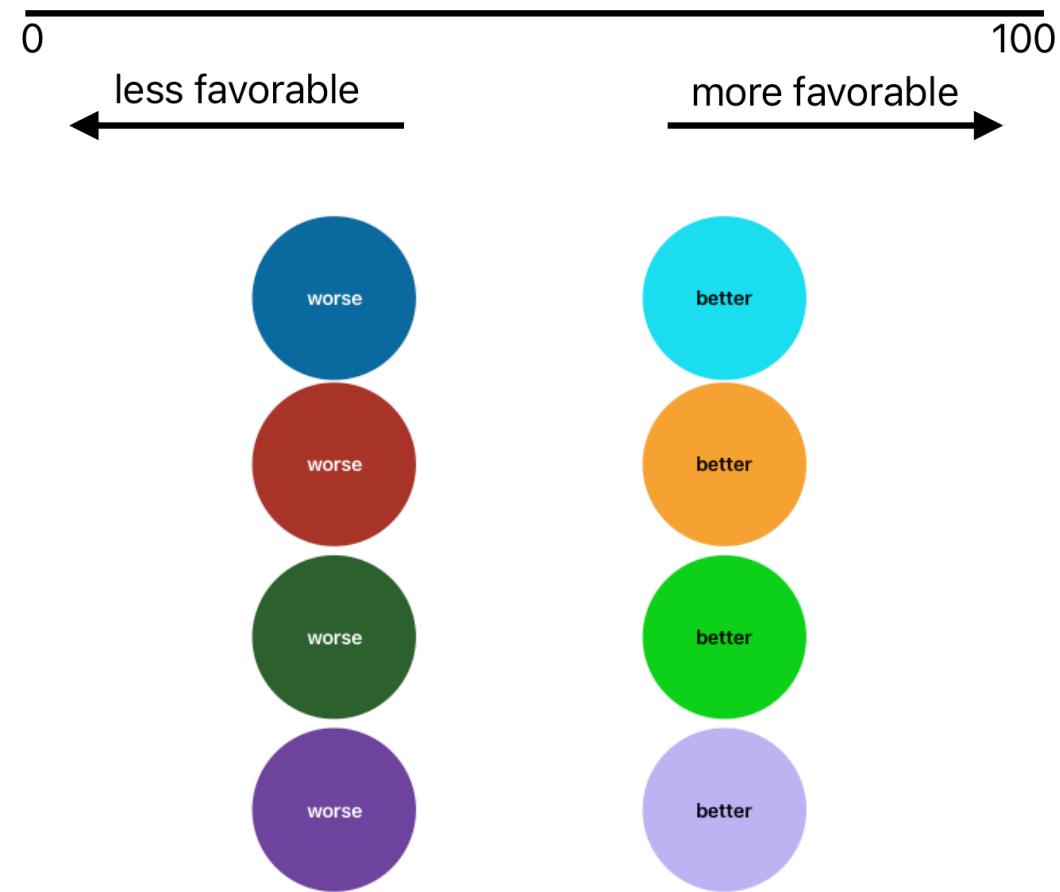

# Overall Scores

How does disabled population in state x fare, when combining relative and equity scores?

$$\text{AVG} \left( \begin{array}{c} \text{relative scores} \\ \text{equity scores} \end{array} \right) = \text{overall scores}$$

# Interpretation

- All maps and tables are on a 100 point scale.
- Higher # = more favorable outcome.
- Higher # = lighter color.

# **ADA-PARC Overall Scorecard**

## ADA-PARC Score Calculation : Relative versus Equity

State	ADA-PARC Relative Score	ADA-PARC Equity Score	ADA-PARC Score
Alaska	55.57	73.02	64.29
Nevada	57.23	68.62	62.92
Utah	60.24	64.72	62.48
Wyoming	57.71	63.57	60.64
Arizona	54.88	63.82	59.35
Delaware	57.18	58.96	58.07
Hawaii	57.41	57.19	57.30
Washington	55.28	56.00	55.64
Idaho	50.55	58.54	54.55
Texas	50.99	57.32	54.15
New Mexico	47.69	59.27	53.48
